H) Applicant Business Description:

Describe in detail company background, products, customers, goods and services. Description is critical in determining eligibility: KCE NY 1 is a project company of Key Capture Energy, Inc (KCE), a developer of energy storage projects. KCE's mission is to develop, construct, and operate energy storage projects. KCE NY 1 is a Battery Energy Storage Project (BESS) that will deliver ancillary services to the New York State Grid via the New York State Independent System Operator (NYISO). In essence, it will provide grid services that benefit all users of electricity. This will be the largest grid-scale battery to be placed on the New York grid and will help to achieve the recently set goal of 1500 MW of energy storage in the state.

Are Real Property Taxes current? ☒ Yes or ☐ No. If no, please explain _____

Town/City/Village: Stillwater School District: Stillwater

Does the Applicant or any related entity currently hold fee title to the Project site? ☐ Yes or ☒ No

If No, indicate name of present owner of the Project Site: Luther Forest Technology Campus

Does Applicant or related entity have an option/contract to purchase the Project site? ☐ Yes or ☒ No

Describe the present use of the proposed Project site: Site is currently vacant land adjacent to NYSEG and National Grid substation.

B) Please provide narrative of project, the purpose of the project (new build, renovations, and/or equipment purchases), and the type of project (educational, recreational, historic preservation, etc.). Identify specific uses occurring within the project. Describe any and all tenants and any/all end users: (This information is critical in determining project eligibility – Attach additional pages if necessary):

KCE NY 1 is a utility scale battery storage facility that will respond to the intermittent grid fluctuations to enhance the power grid reliability to service peak demand. The development will have no emissions, a low noise profile, and will be screened by existing vegetation and land masses. The system proposes to use Lithium-ion batteries organized in modules and installed in rack towers to control the exchange of power into and out of the system. The racks are organized into containers similar to shipping containers which are equipped with heating and cooling systems, fire suppression systems, and control systems. These containers are organized on the gravel pad and connected to the power substation to accept and release power as needed.

Describe the reasons why the Agency's financial assistance is necessary, and the effect the Project will have on the Applicant's business or operations. Focus on competitiveness issues, project shortfalls, etc... Your eligibility determination will be based in part on your answer (attach additional pages if necessary): This is the first project of this type in the State of New York and there are certain unknowns associated with the financial modeling, including the real estate taxes to be paid and what, if any, sales taxes should be paid for the purchase of the equipment. The Project is not necessarily seeking a significant reduction in the amount of real property taxes but rather seeking certainty concerning the payments of taxes. Unlike solar or other forms of electrical generating equipment where there is clear guidance concerning the exemption for sales tax for the purchase of equipment, the NYS rules and regulations have not established a policy concerning battery for an energy storage facility.

Please confirm by checking the box below if there is likelihood that the Project would not be undertaken but for the Financial Assistance provided by the Agency?

☒ Yes or ☐ No

If the Project could be undertaken without Financial Assistance provided by the Agency, then provide a statement in the space provided below indicating why the Project should be undertaken by the Agency: _____
